SUMMARY

Enthusiastic and detail-oriented aspiring technology professional with a strong passion for problem-solving, adaptability, and continuous learning. Seeking an entry-level opportunity to leverage technical knowledge, contribute to innovative projects, and grow professionally in a collaborative team environment.

WORK EXPERIENCE

Software Intern

Agnirva (by Indian Space Research Organisation)

- Contributed to software development under ISRO-affiliated guidance, assisting in application module development, testing, debugging, and code optimization.
- Gained exposure to real-world development workflows, technical discussions, and software documentation practices.

Full Stack Developer Intern

Future Intern

- Completed assigned full-stack development tasks, implementing web application features and integrating frontend with backend components.
- Built and deployed project modules independently, managing source code with GitHub while following development workflows including coding, testing, and version control.

PROJECTS

Smart Crop Advisor

- Built AI crop recommendation system using Python/FastAPI with real-time weather & soil APIs.
- Developed ViT-based pest detection model achieving 95% disease identification accuracy.
- Integrated GPT-4, Gemini, and DeepSeek APIs to create a multi-LLM agricultural chatbot.
- Designed responsive web platform with modules for crop advice, market tracking, and alerts.
- Implemented 10-day weather analytics to support data-driven farming decisions.

AI-Based Industrial Safety Monitoring System

- Developed AI safety monitoring system using Python and OpenCV for real-time detection of humans in restricted industrial zones.
- Implemented computer vision–based face detection to trigger automatic machine shutdown and safety alerts.
- Integrated audio-visual warning system for automated industrial safety monitoring and surveillance.

EDUCATION

Bachelor of Technology (B.Tech) in Artificial Intelligence and Data Science

GRT Institute of Engineering and Technology

- CGPA: 8.53
- Relevant Coursework: Data Structures, Machine Learning, Deep Learning, Big Data Analytics, Devops, Data Warehouse, Database Management Systems.

SKILLS

Languages	Python, Java
Tools/Frameworks	FastAPI, OpenCV, TensorFlow, PyTorch, Git, GitHub, Power BI, Tableau
Databases	MySQL, SQLite
Other Skills	Machine Learning, Deep learning, NLP, LLM, API Integration, Prompt Engineering, GenAI Tools, Problem Solving, Workflow and Automation

CERTIFICATES

- Artificial Intelligence Primer Certification — Infosys
- Principles of Generative AI Certification — Infosys
- Data Analytics Job Simulation — Deloitte
- Computer Vision 101 — Infosys
- Cloud Computing — NPTEL
